

kokchun giang

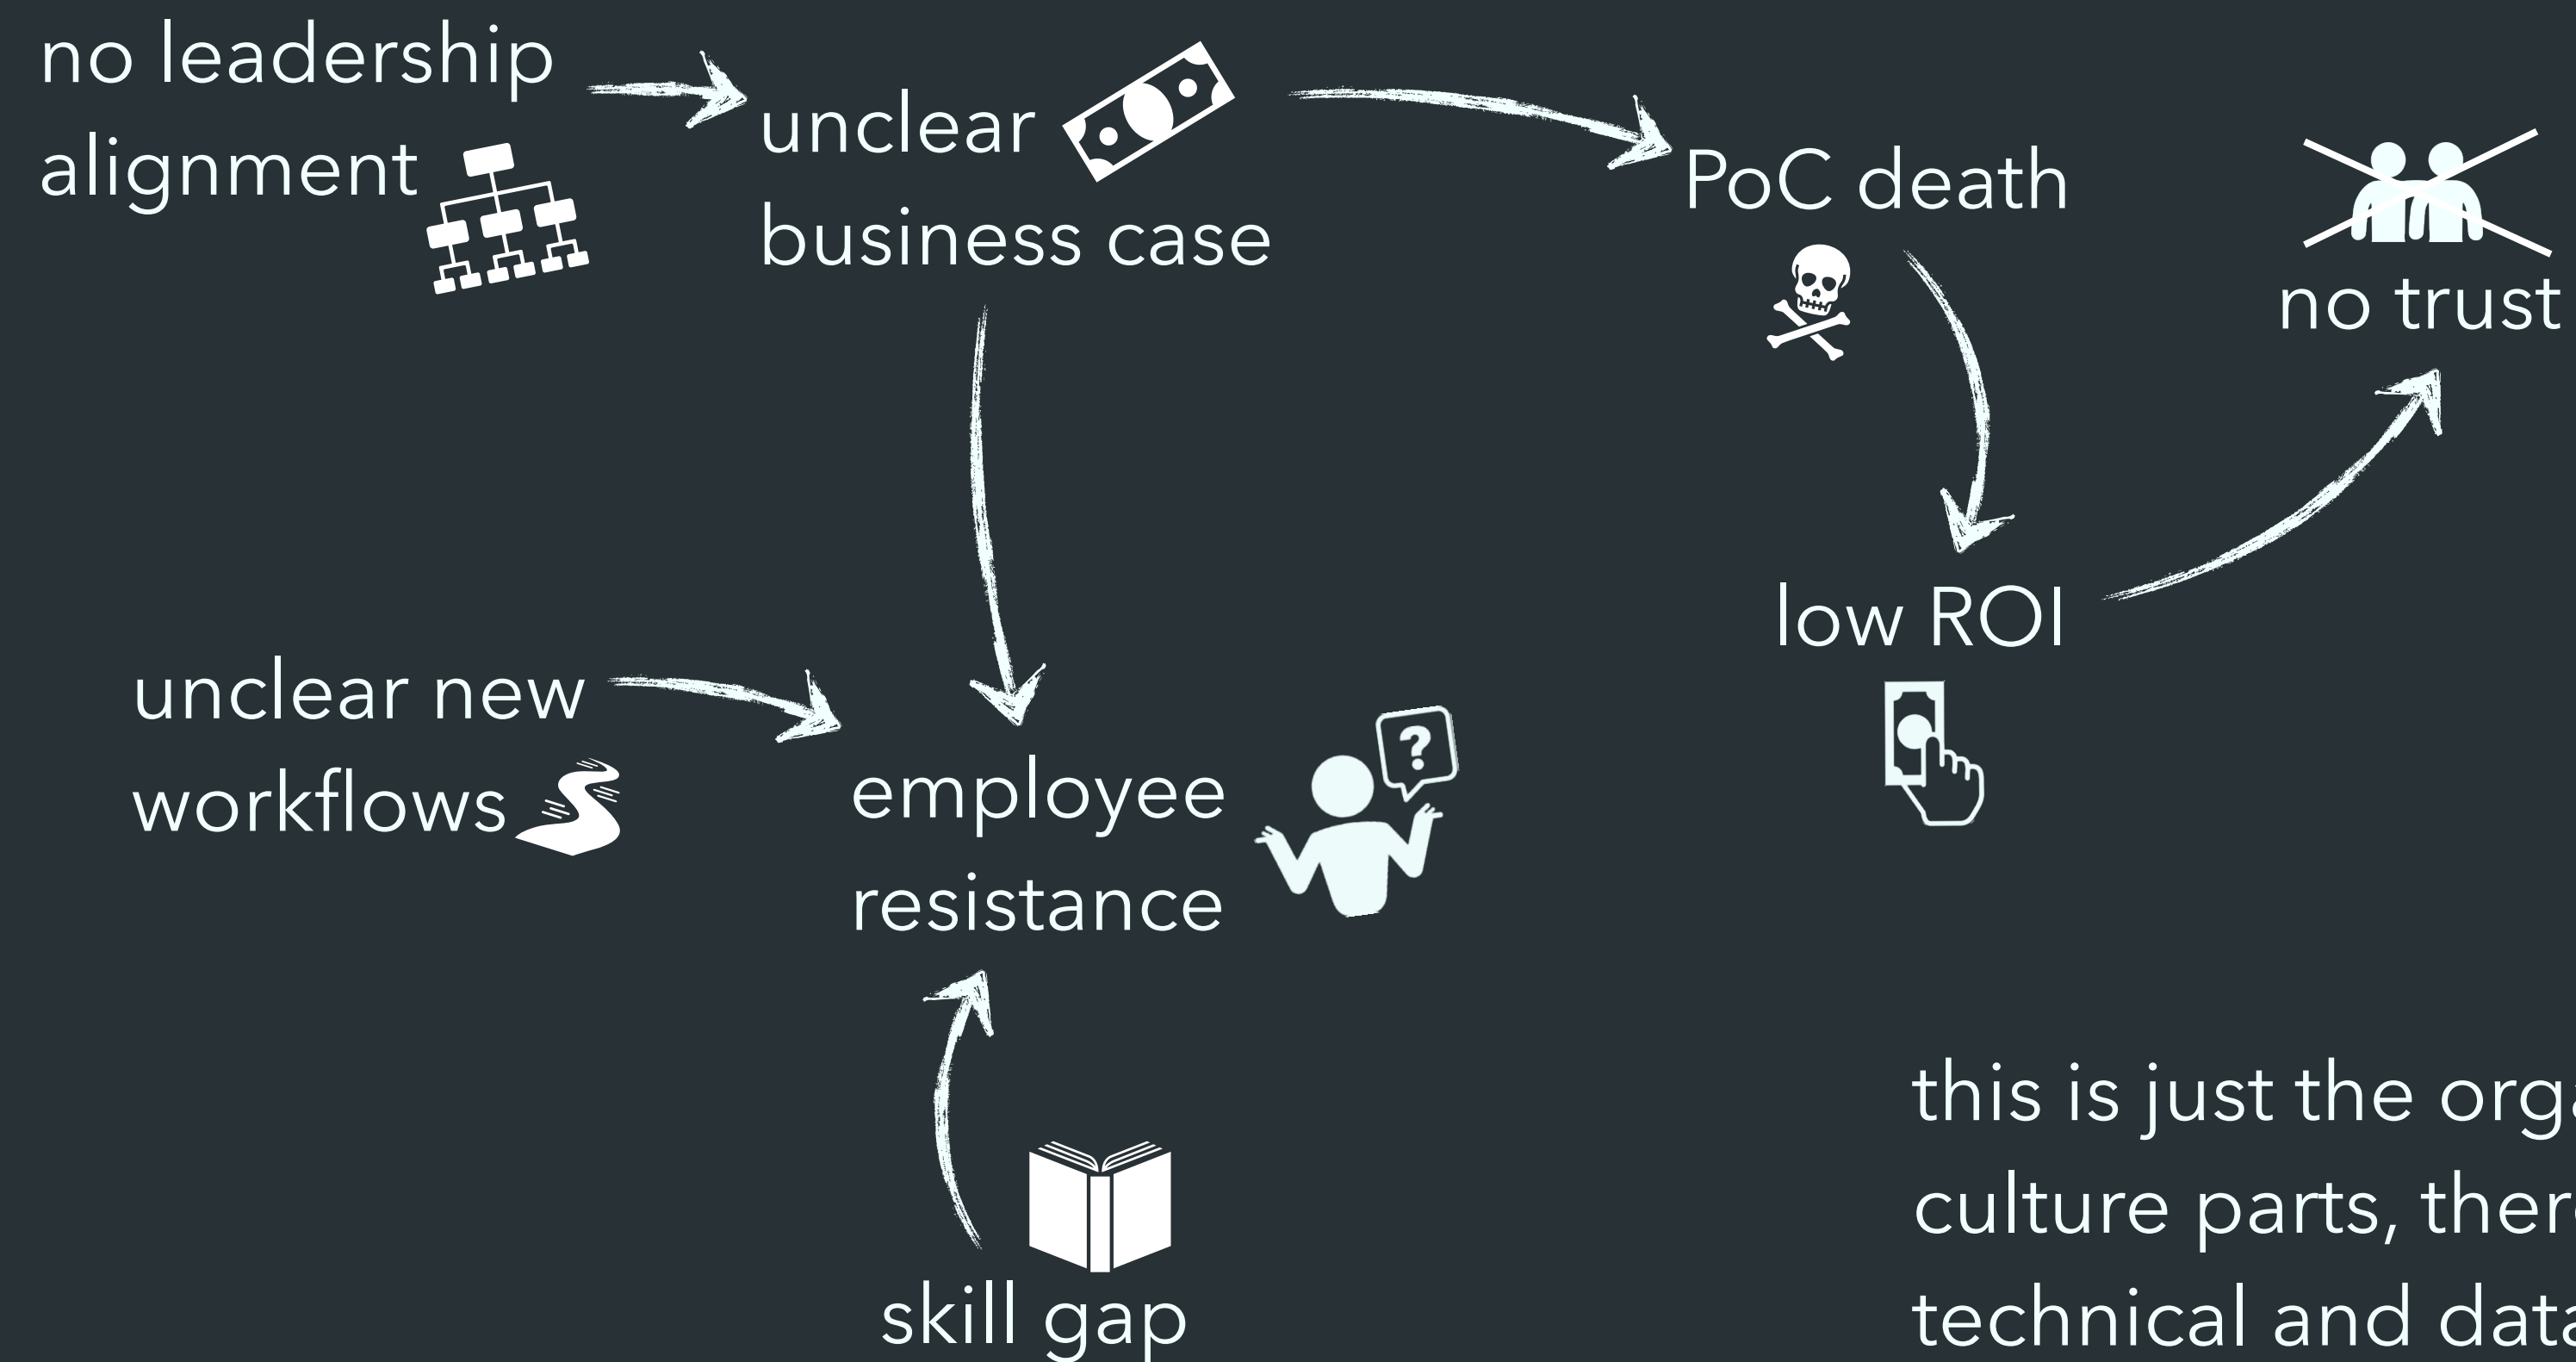

start your **AI**
adoption in your
organization

focus on the **capabilities of AI** rather than definition

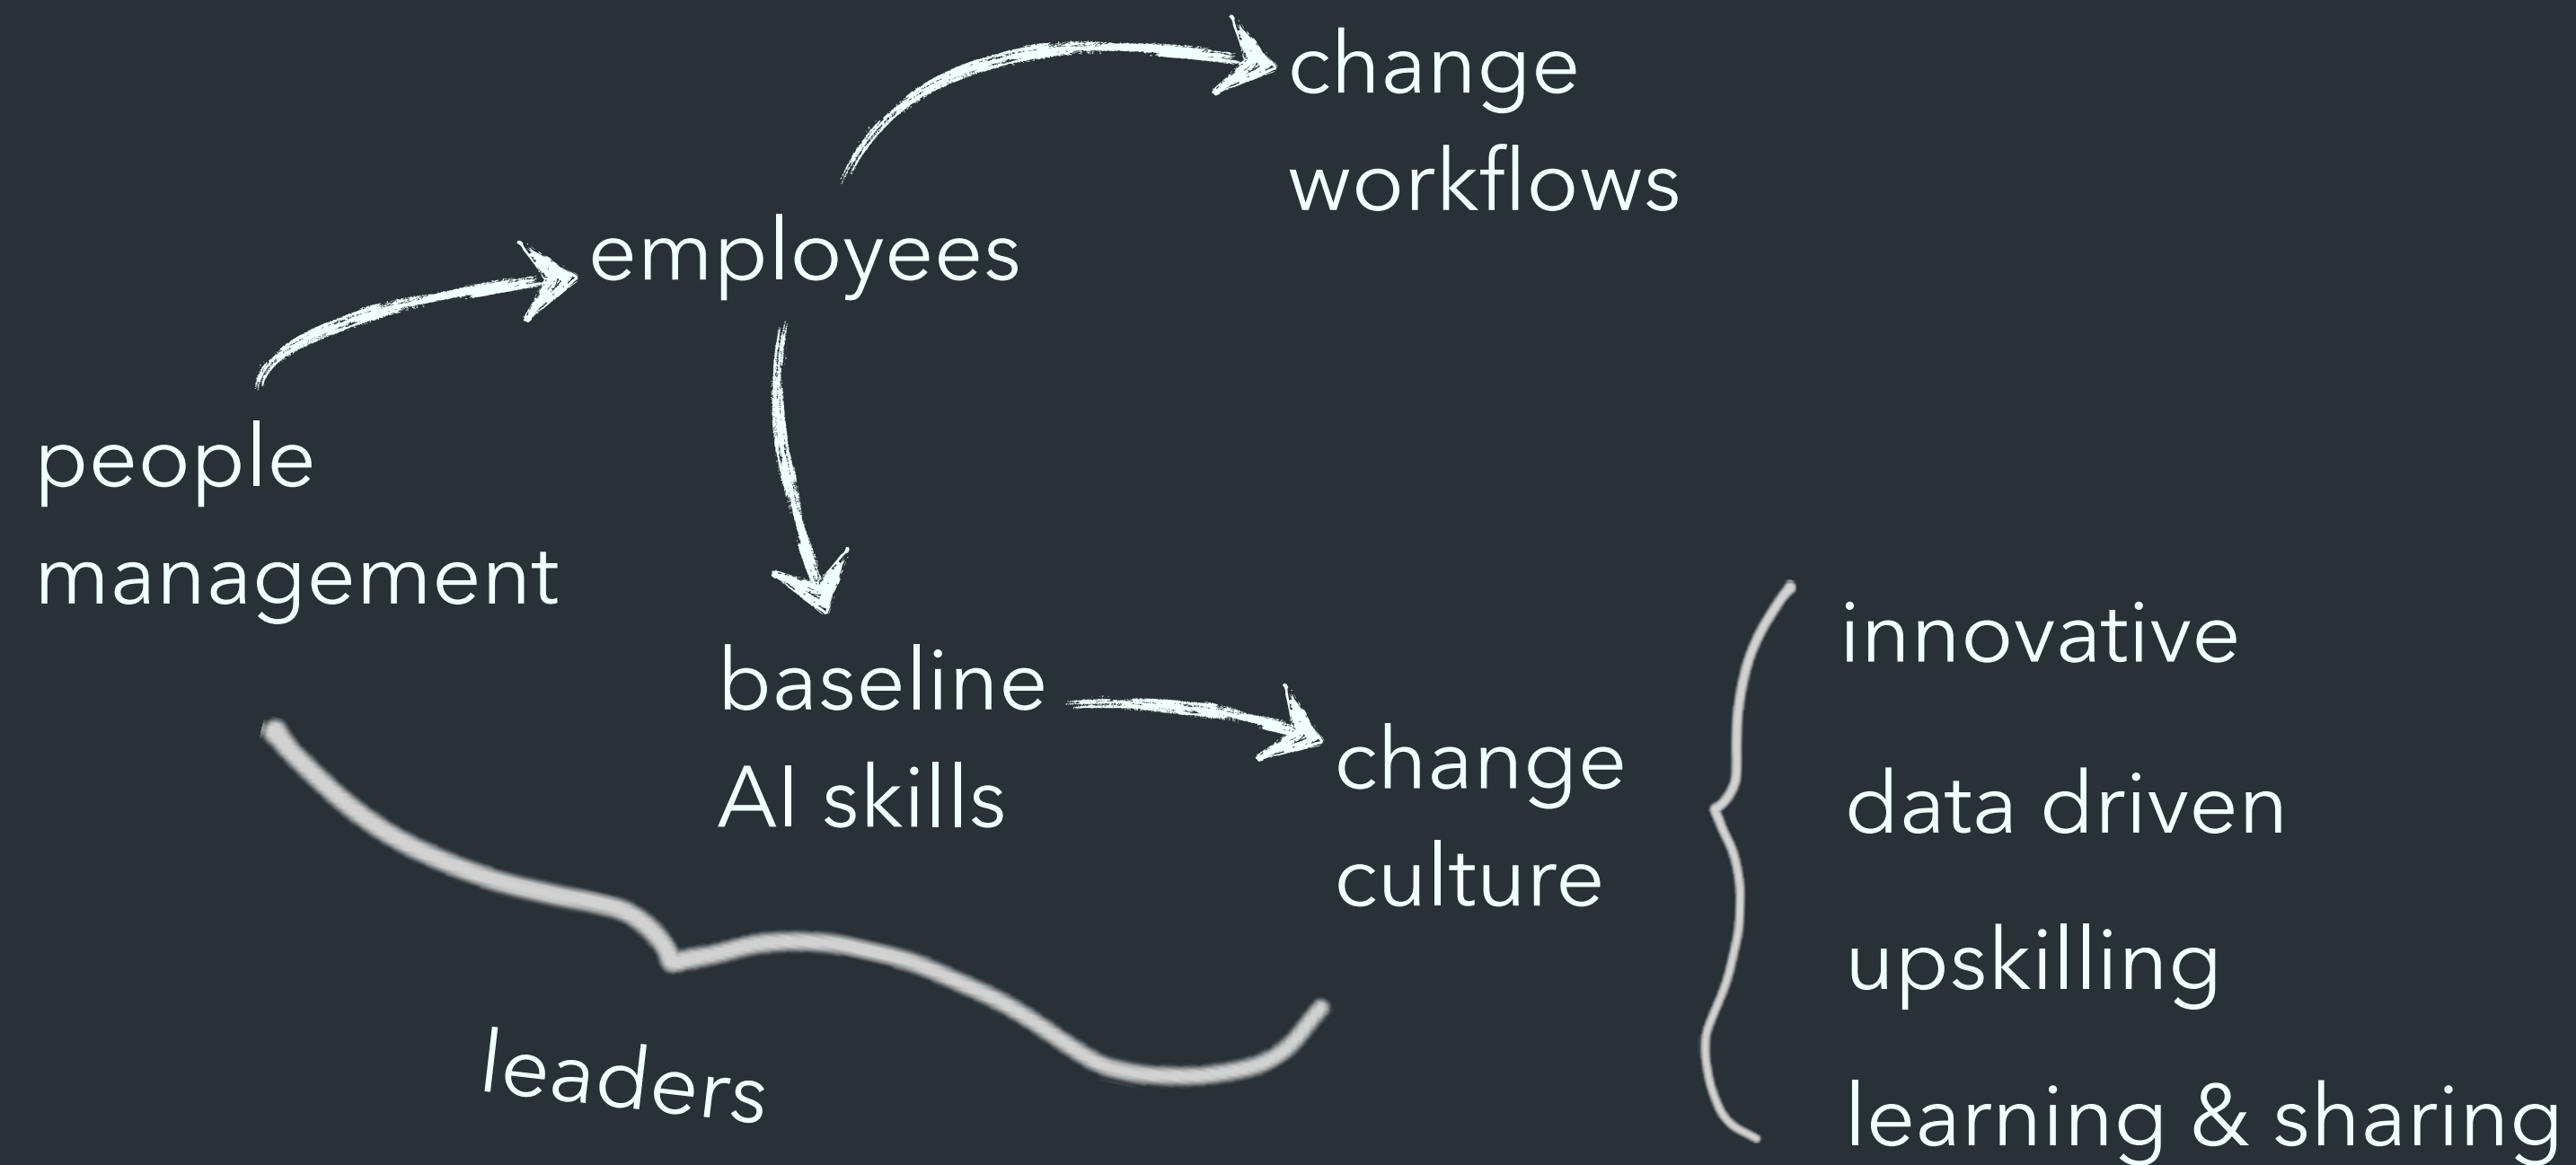

how can we adopt these capabilities to improve our organization?

challenge to integrate and adopt AI in an organization

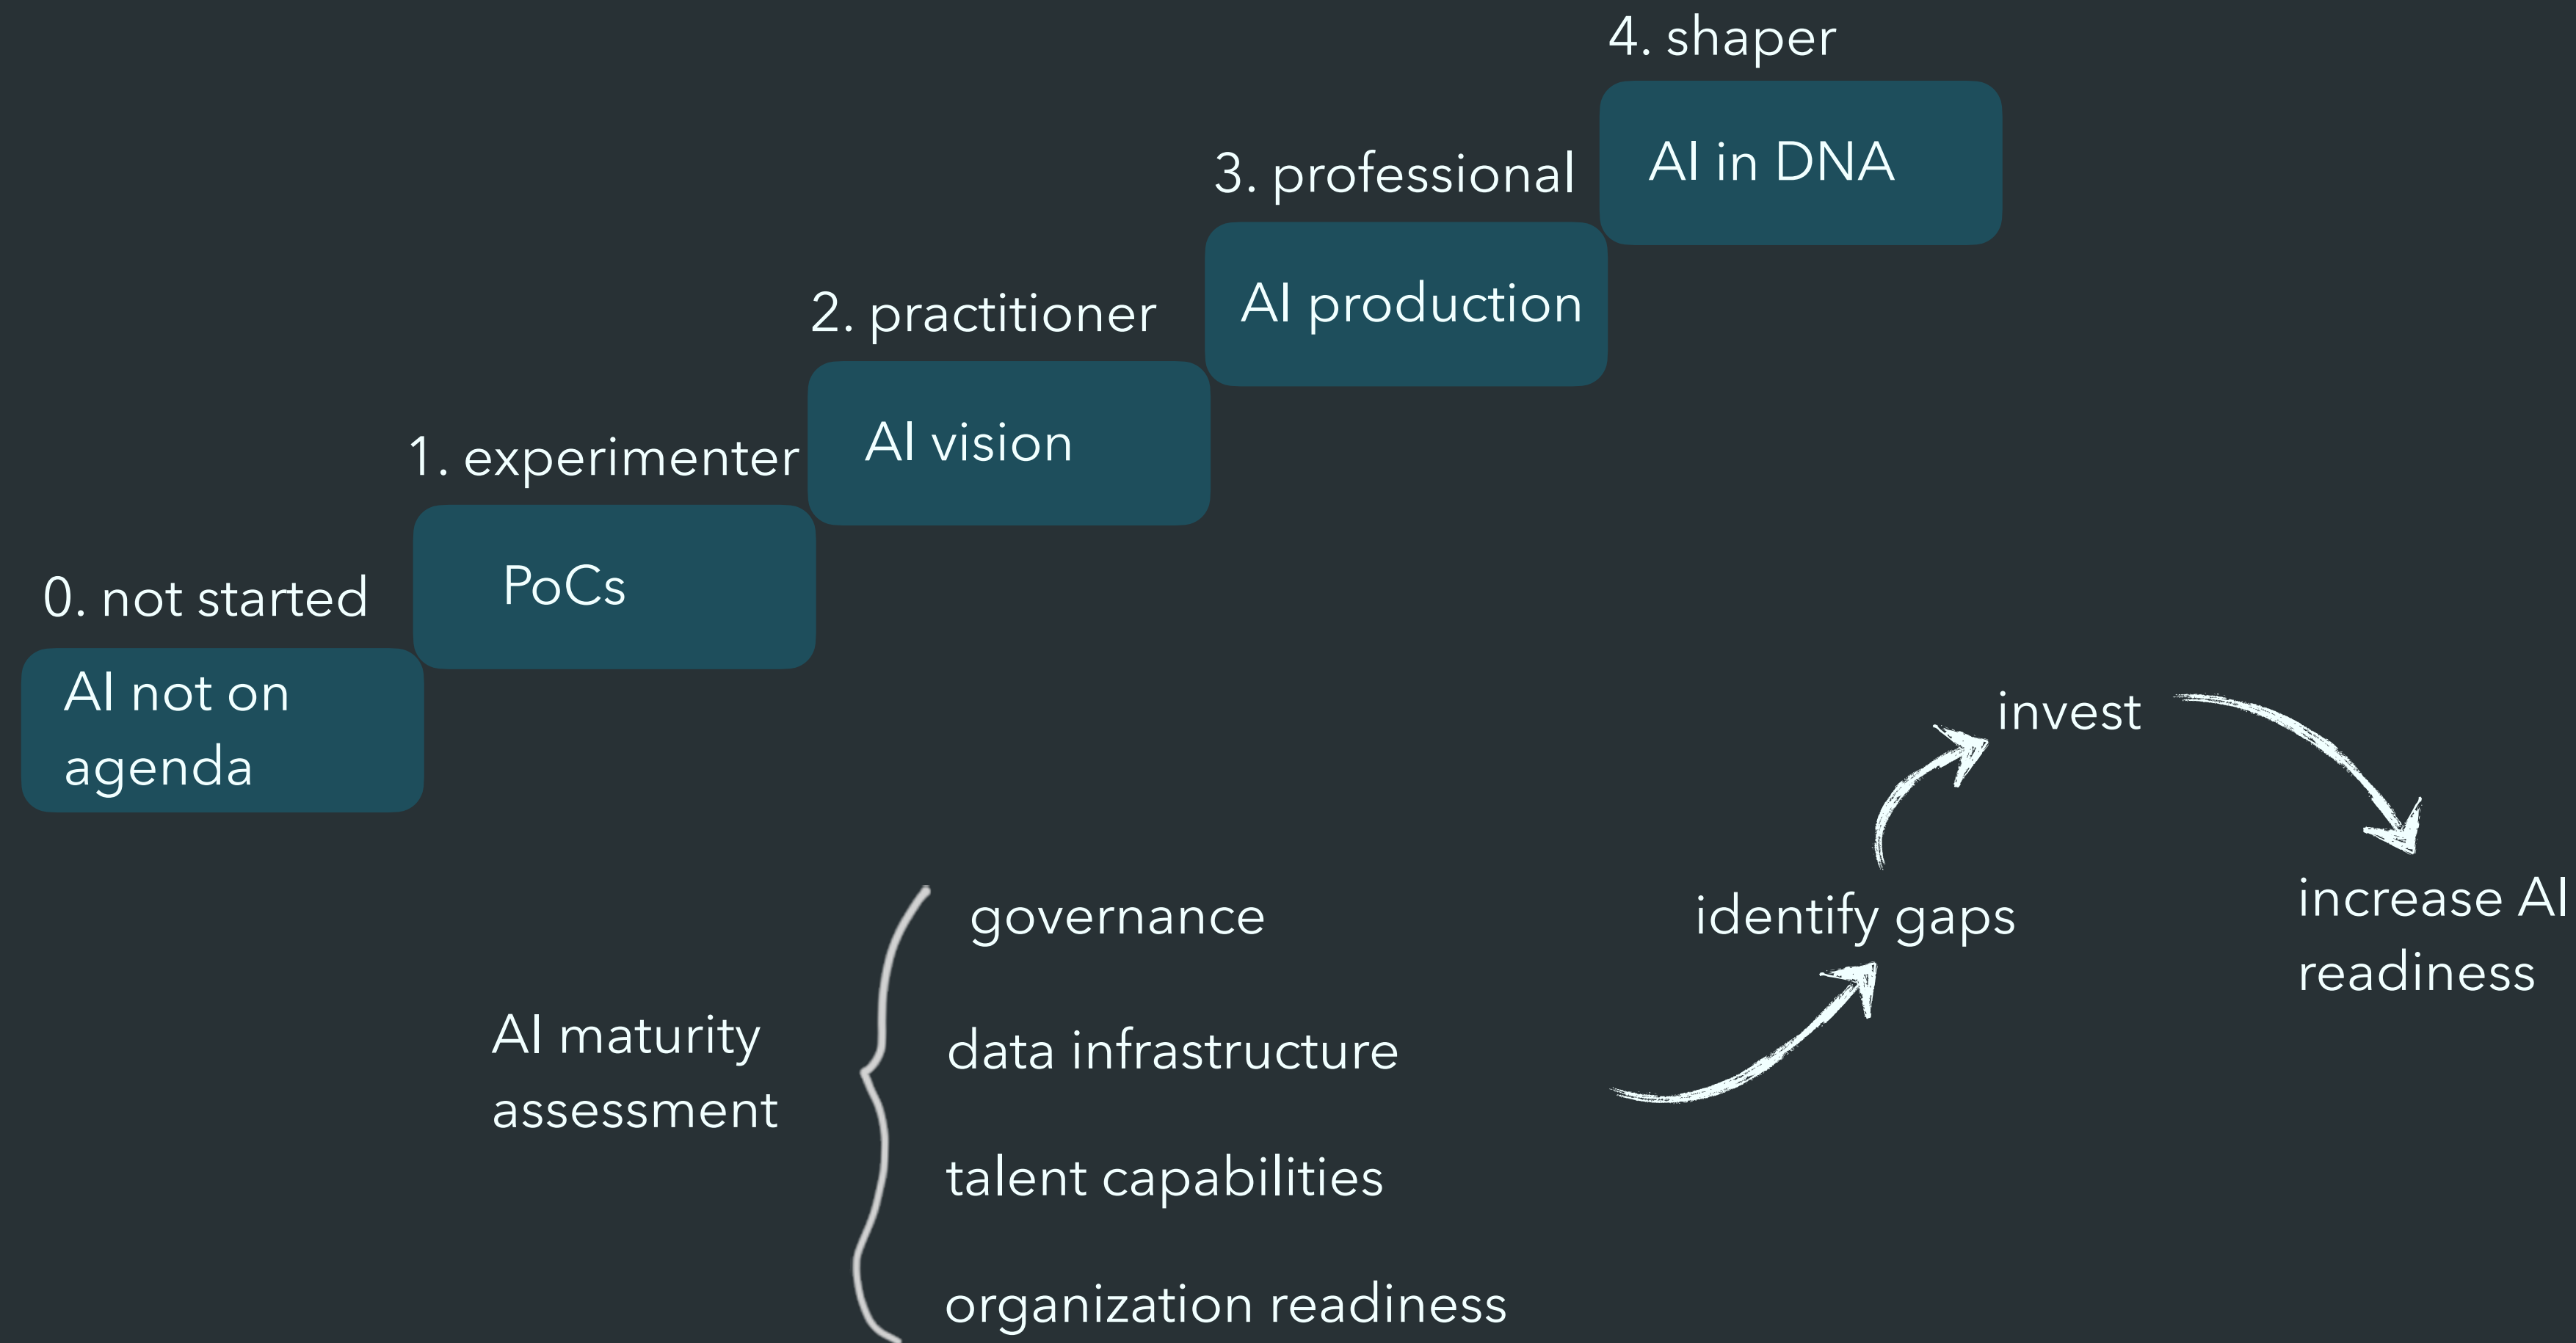

this is just the organizational and culture parts, there is also technical and data considerations

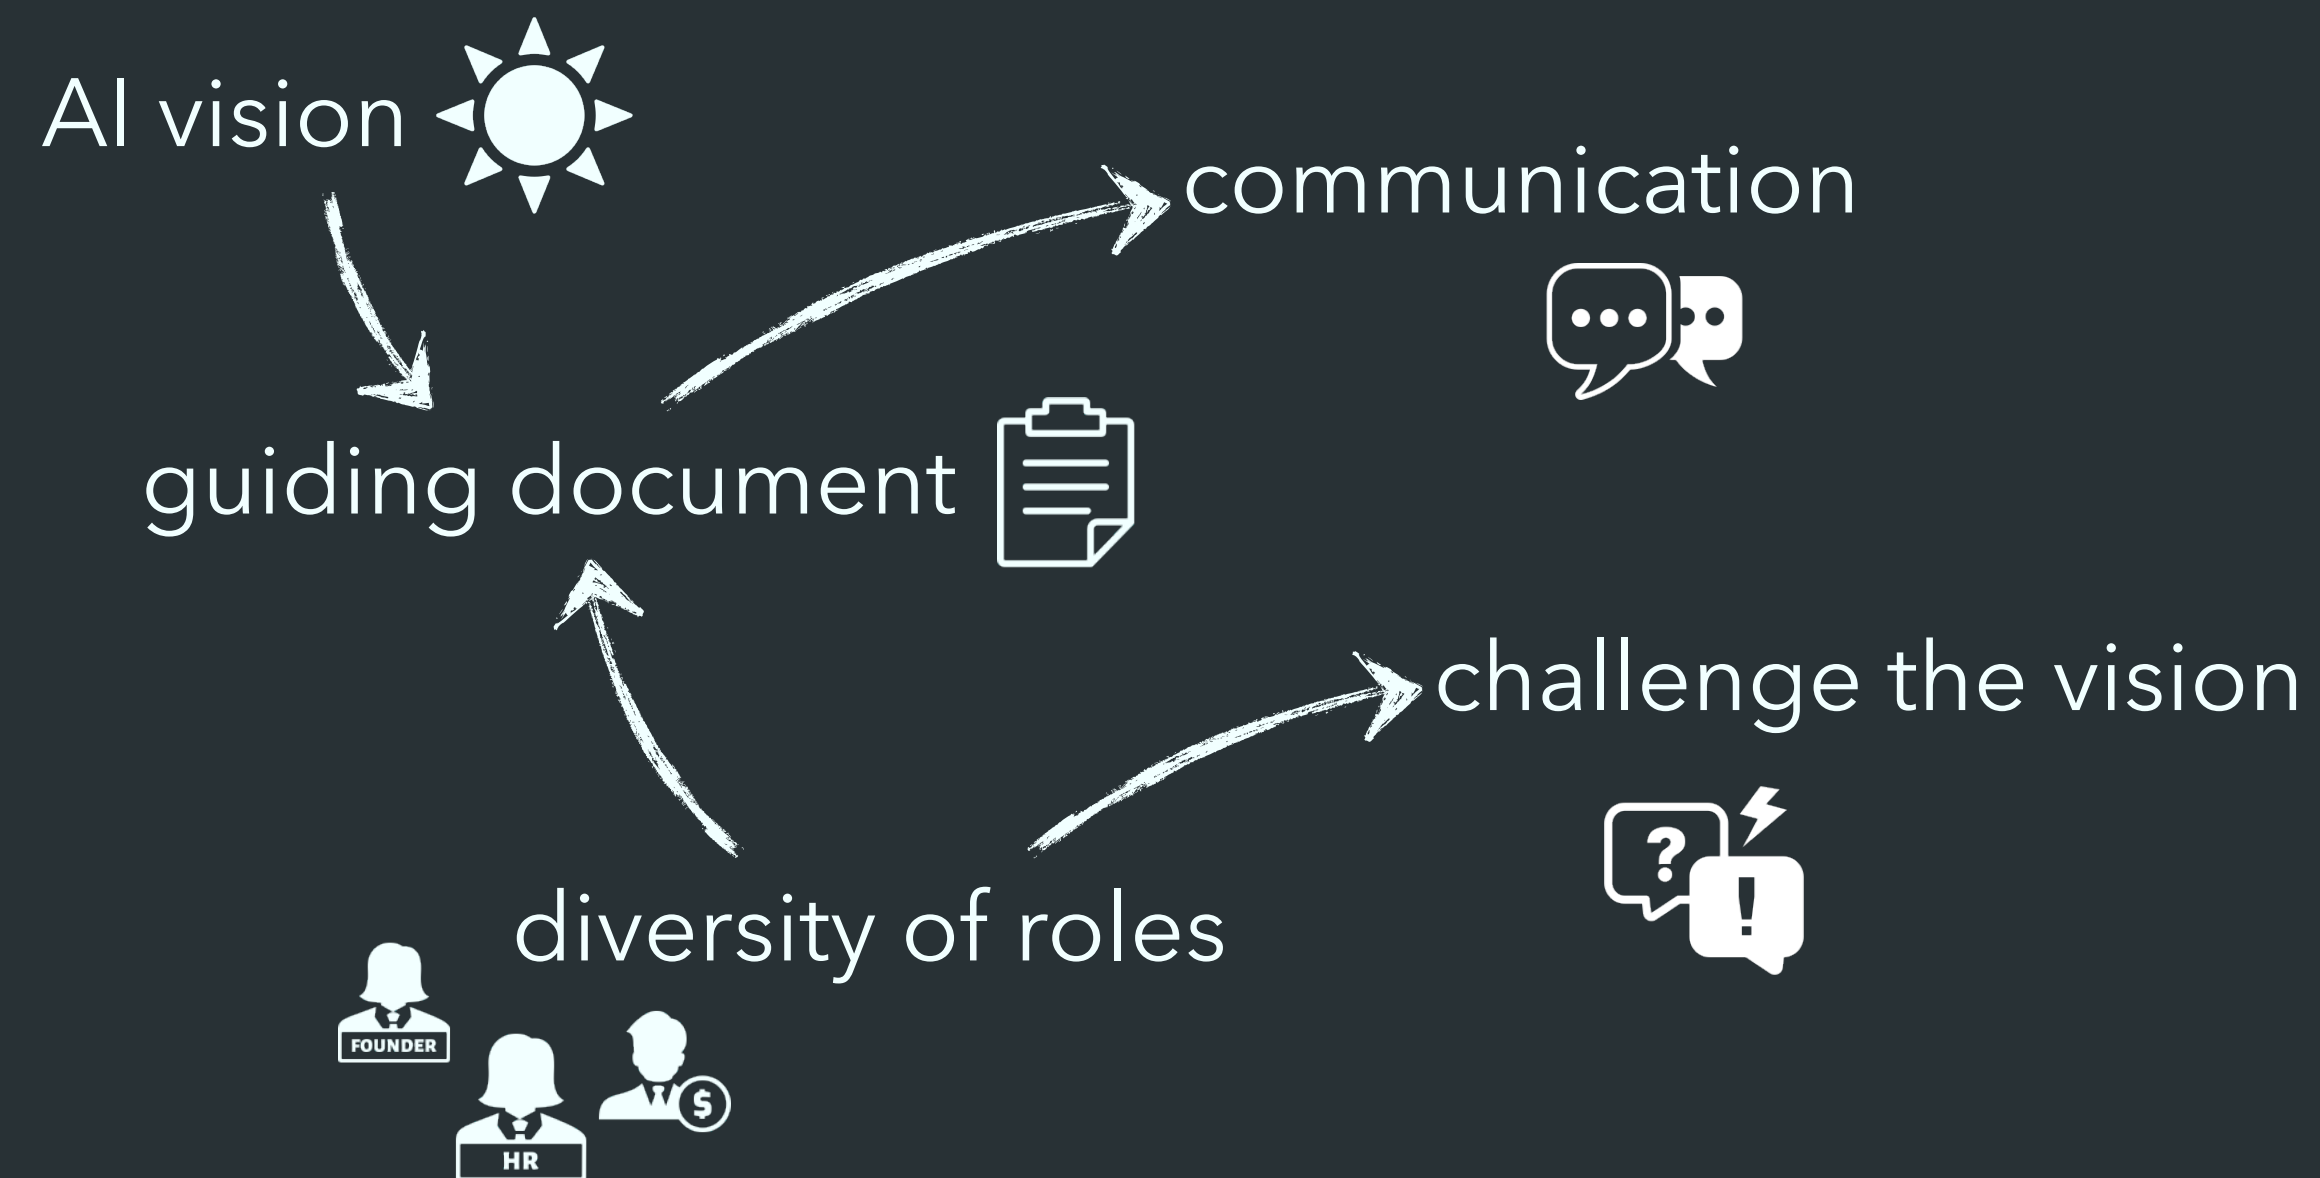

leadership - shape an AI ready culture

organizations **AI maturity** is their level of expertise

AI vision - the guiding north star

questions

what business value
does AI create? 

impact goals with AI 

one-liner
